

Amended claims

1. Multipart male mold plate (1) for a form tool for injection-molding of molded
5 articles, in particular PET preforms (6), said male mold plate (1) comprising a base plate
 (2) and a stripper plate (3) having a slide (4), on which slide (4) there is provided a
 plurality of separable male mold cones (5, 5'), and there is provided at least one
 hydraulic drive (12) for completely opening the male mold cones (5, 5'), characterised in
 that the hydraulic drive (12) is secured to the slide (4) and rests against the stripper
10 plate (3).
2. Male mold plate according to claim 1, characterised in that the hydraulic drive (12)
 cooperates with a pull-back spring.
- 15 3. Male mold plate according to claim 1, characterised in that the hydraulic drive (12)
 cooperates with a second hydraulic drive for opening the male mold cones (5, 5').
4. Male mold plate according to claim 1, characterised in that an inclined drag
 element (7) is secured to the base plate (2), by means of which the slide (4) is
20 actuatable in such a way that said slide (4) can open the male mold cones (5, 5') merely
 for a detachment stroke (h) at a position (C) between a closing position (A) and an
 extraction position (B).
